# Assessment of CSIRO Impact & Value

Report prepared as input to  
CSIRO's Lapsing Program Review

Prepared for CSIRO

July 2010

**ACIL Tasman**

Economics Policy Strategy

## **ACIL Tasman Pty Ltd**

ABN 68 102 652 148

Internet [www.aciltasman.com.au](http://www.aciltasman.com.au)

### **Melbourne (Head Office)**

Level 4, 114 William Street  
Melbourne VIC 3000

Telephone (+61 3) 9604 4400  
Facsimile (+61 3) 9604 4455  
Email [melbourne@aciltasman.com.au](mailto:melbourne@aciltasman.com.au)

### **Brisbane**

Level 15, 127 Creek Street  
Brisbane QLD 4000  
GPO Box 32  
Brisbane QLD 4001

Telephone (+61 7) 3009 8700  
Facsimile (+61 7) 3009 8799  
Email [brisbane@aciltasman.com.au](mailto:brisbane@aciltasman.com.au)

### **Canberra**

Level 1, 33 Ainslie Place  
Canberra City ACT 2600  
GPO Box 1322  
Canberra ACT 2601

Telephone (+61 2) 6103 8200  
Facsimile (+61 2) 6103 8233  
Email [canberra@aciltasman.com.au](mailto:canberra@aciltasman.com.au)

### **Darwin**

GPO Box 908  
Darwin NT 0801

Email [darwin@aciltasman.com.au](mailto:darwin@aciltasman.com.au)

### **Perth**

Centa Building C2, 118 Railway Street  
West Perth WA 6005

Telephone (+61 8) 9449 9600  
Facsimile (+61 8) 9322 3955  
Email [perth@aciltasman.com.au](mailto:perth@aciltasman.com.au)

### **Sydney**

PO Box 1554  
Double Bay NSW 1360

Telephone (+61 2) 9389 7842  
Facsimile (+61 2) 8080 8142  
Email [sydney@aciltasman.com.au](mailto:sydney@aciltasman.com.au)

Denise Ironfield

Mark Barber

Alan Smart

John Söderbaum

Guy Dundas

## **Contents**

<b>Executive Summary &amp; Recommendations</b>	<b>viii</b>
<b>1 Purpose</b>	<b>1</b>
<b>2 Introductory comments</b>	<b>2</b>
<b>3 Balanced assessing of R&amp;D</b>	<b>5</b>
3.1 Conservatism vs optimism	5
3.2 Value of sustained Australian innovation	8
<b>4 Approach</b>	<b>13</b>
4.1 Value framework	16
<b>5 Rationale for CSIRO funding</b>	<b>20</b>
<b>6 What is CSIRO?</b>	<b>22</b>
6.1 Formal nature & functions	22
6.2 Characterisation and operating model	23
6.2.1 Transformational capability platforms	31
<b>7 How does CSIRO add value?</b>	<b>33</b>
<b>8 Selection of case studies</b>	<b>34</b>
<b>9 Overview of case studies</b>	<b>38</b>
9.1 The Climate Adaptation Flagship	38
9.1.1 Bushfire research	39
9.1.2 Coastal communities	39
9.1.3 Climate ready crops	39
9.2 Cement substitutes and novel products	40
9.3 Aquaculture prawn breeding & novel feeds	41
9.4 APSIM	43
9.5 Murray-Darling: Policy & strategy support	44
9.6 Resistant starch grains	45
9.7 Titanium within the Light Metals Flagship	46
9.8 The UltraBattery	47
9.9 Mapping of undersea mineral deposits	49
9.10 Biochar	50
9.11 Radioastronomy & the SKA	51
9.12 Cross-CSIRO climate strategy support	52
<b>10 Summary of direct case study value inferences</b>	<b>53</b>
<b>11 Impact through collaboration</b>	<b>59</b>

<b>12 Value in the wider CSIRO portfolio</b>	<b>61</b>
12.1 Mapping other activities against the case studies	62
12.2 Lessons for all of CSIRO value	67
<b>13 Recommendations: CSIRO strategy</b>	<b>69</b>
<b>A CSIRO functions under its Act</b>	<b>A-1</b>
<b>B Mapping CSIRO across capabilities, costs and outcomes</b>	<b>B-1</b>
<b>C Capabilities used by Theme</b>	<b>C-1</b>
<b>D Valuing carbon abatement</b>	<b>D-1</b>
<b>E Climate Adaptation Flagship</b>	<b>E-1</b>
<b>F Aquaculture prawn breeding and novel aquaculture feeds</b>	<b>F-1</b>
<b>G Cement substitutes &amp; novel products</b>	<b>G-1</b>
<b>H APSIM</b>	<b>H-1</b>
<b>I Murray-Darling: Policy &amp; Strategy Support</b>	<b>I-1</b>
<b>J Resistant Starch Grains</b>	<b>J-1</b>
<b>K Titanium within Light Metals</b>	<b>K-1</b>
<b>L The UltraBattery</b>	<b>L-1</b>
<b>M Mapping of undersea mineral deposits</b>	<b>M-1</b>
<b>N Biochar</b>	<b>N-1</b>
<b>O Radioastronomy &amp; the SKA</b>	<b>O-1</b>
<b>P Cross-CSIRO climate strategy</b>	<b>P-1</b>
<b>List of boxes</b>	
Box 1      Indicative funding flows into Australian R&D, 2004-05	24
Box 2      Australian Animal Health Laboratory (AAHL) – provides insurance against biosecurity risks	66
Box E1     Current and completed CAF projects	E-6
Box E2     Value of adaptation in reducing costs of climate change	E-14
Box L1     What is a supercapacitor?	L-2
Box O1     CSIRO, radioastronomy and wireless networking: value of serendipity & breadth in science	O-3

### List of charts

Chart 1	Australian agriculture: trends in terms of trade and total factor productivity	9
Chart 2	Impact of TFP on offsetting damage: attributed to source of innovation	10
Chart F1	World wild catch (food and industrial) and aquaculture production trends (million tonnes)	F-21
Chart F2	Fisheries economics	F-23
Chart F3	Illustration of price effects on Australian wild catch prawn fishing	F-24
Chart H1	APSIM citations	H-7
Chart H2	Time trend of modelling papers as a percent of total papers presented at the Australian Agronomy Conference between 1992 and 2008	H-7
Chart H3	Cumulative distribution functions of grain yield for different levels of available soil water at sowing for a reliable (Gunnedah) and marginal (Walgett) canola production area in northern NSW. Each composed of 103 simulated seasons (1990-2002)	H-13
Chart H4	Area and yield of canola in northern cropping areas of NSW and southern Queensland	H-14
Chart H5	Potential (simulated) yield v attainable yield (quadrat) for the spring-sown crops grown in 1996-97 (n=6) and 1997-98 (n=19)	H-15
Chart H6	Percentage of total seasonal receipts that came from spring-sown mungbean crops, over the 4 growing seasons 1994-95 to 1997-98	H-16
Chart N1	Overview of current CSIRO biochar projects	N-3

### List of figures

Figure 1	CSIRO's Operational model	30
Figure E1	Disciplines contributing to the work of the Flagship	E-4
Figure E2	Per cent of GNP lost due to the impact of climate change	E-11
Figure E3	NPV of annual GDP foregone (\$million)	E-12
Figure E4	NPV of total GDP foregone from 2010 to 2100 (\$billion)	E-13
Figure E5	Annual (NPV) amount by which GDP losses are reduced due to adaptation linked to Flagship research	E-15
Figure E6	Cost of research on fire truck safety and car safety in bushfires	E-24
Figure E7	Projections of sea-level rise to 2050 from the IPCC Third Assessment Report	E-26
Figure E8	Cost of Flagship research on coastal communities	E-28
Figure E9	Cost of CSIRO research on climate ready crops	E-35
Figure G1	Structure of stylized roof tile possibilities	G-23
Figure G2	Roofing tile scenario outcomes	G-23
Figure H1	A frame work using models in farming systems research	H-3
Figure H2	Schematic representation of the process of in-season crop yield forecasting	H-5
Figure J1	Annual investment in BARLEYmax and HA wheat R&D (nominal dollars)	J-6
Figure J2	Assumed Australian Production of BARLEYmax and AH wheat (tonnes)	J-9
Figure O1	Overview of structure of the SKA options model	O-12
Figure O2	Indicative solution of options model, revised assumptions	O-13

Figure P1	<b>The breadth and depth of CSIRO work on climate change</b>	P-1
Figure P2	<b>Architecture of the proposed AICAS</b>	P-3

**List of tables**

Table 1	<b>Case studies demonstrate CSIRO’s multi-dimensional value</b>	35
Table 2	<b>Indicative relationship between case studies and CSIRO Flagships</b>	36
Table 3	<b>Indicative mapping of other CSIRO activities against the case studies</b>	63
Table D1	<b>Indicative estimates of global social cost of carbon (AUD/t CO<sub>2</sub>)</b>	D-9
Table E1	<b>Estimated impact of a 1:100 event in SEQ under scenario 1</b>	E-30
Table E2	<b>Estimated impact of a 1:100 event in SEQ under scenario 2</b>	E-31
Table F1	<b>Aggregate larviculture and juvenile rearing tank effects on shrimp growout traits (variance components)</b>	F-7
Table F2	<b>Reduction in selection response determined by detected tank effects under current program design and parameters (theoretical estimate)</b>	F-7
Table F3	<b>Comparative genetic gain</b>	F-8
Table F4	<b>Capabilities used in the aquaculture breeds stream</b>	F-11
Table F5	<b>Capabilities used in the feedsfeed technologies stream</b>	F-11
Table F6	<b>CSIRO’s own contribution estimates (forecast gross sales increase estimates or cost savings \$’000)</b>	F-12
Table F7	<b>Cost of production of a kg of prawns to changes in yield and feed conversion</b>	F-14
Table F8	<b>Australian prawn production and trade</b>	F-15
Table F9	<b>Estimated additional prawn production and value form adoption of elite breeding stock</b>	F-17
Table F10	<b>Sensitivity to adoption rate (million)</b>	F-18
Table F11	<b>Estimated value of novel feed ingredient (combined with expected increase in prawn production from adoption of breeding techniques)</b>	F-19
Table F12	<b>Fish meal and oil consumption</b>	F-21
Table F13	<b>Estimated economic losses associate with fishing at maximum sustainable yield compared to fishing at maximum economic yield</b>	F-24
Table H14	<b>The growth of Yield Prophet<sup>®</sup>’s subscriptions and usage from 2002 to 2007</b>	H-10
Table H15	<b>Long term average (1990-2002) simulated grain yield, oil content and gross margin by April-May SOI phase for Moree. Simulations assumed 100mm available soil water at sowing</b>	H-13
Table J1	<b>Australian wheat and Barley production (Wheat product kilo tonnes)</b>	J-3
Table J2	<b>The burden of selected diseases</b>	J-4
Table J3	<b>Health benefits of adding high fibre to a low fibre diet</b>	J-4
Table J4	<b>Investment in BARLEYmax and HA wheat R&amp;D</b>	J-6
Table J5	<b>Benefits and costs of BARLEYmax<sup>TM</sup> and HA wheat</b>	J-15
Table J6	<b>Sensitivity analysis</b>	J-16
Table L1	<b>Australian Funding development of the UltraBattery technology</b>	L-6
Table L2	<b>Worldwide advanced battery vehicle sales in 2020</b>	L-9
Table L3	<b>Scenario analysis – potential revenue from UltraBattery automotive use royalties</b>	L-11
Table L4	<b>IEA wind generation growth projections</b>	L-16

Table L.5    **Scenario analysis – potential CSIRO royalty revenue from wind applications**
