

# Industry PhD

Developing a new breed of innovators

# Our graduates deliver real world solutions across industry, applied research and academia for the benefit of society.

The Industry PhD program seeks to **attract high calibre candidates** with the vision of **developing Australia's future research leaders**.

The program **actively promotes collaboration** between **academia, industry** and the **research sectors** to shape the future of industrial research training.

We will be **creating research leaders** who are work ready and **understand the needs of industry**, our graduates will **grow our industries** and **contribute to an innovative Australia**.

A four-year program,  
**minimum six month  
industry internship**

Simple  
**intellectual property  
arrangement**

**Balanced investment:**  
co-investment between  
industry partner, CSIRO  
and university partner

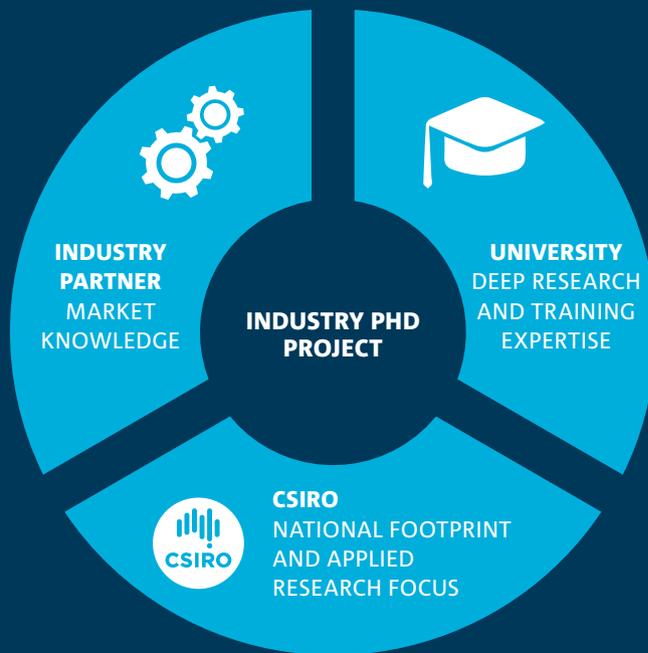

An attractive  
scholarship to **attract  
top PhD candidates**

# Driven by industry needs

The Industry PhD program is specifically designed to **shape the future of industrial research training in Australia** and **improve our innovation capacity**.

**Industry PhD projects** are closely related to Industry partners' demands and interests.

We are looking for leaders in **large, medium and small enterprise** to be a part of this **industry-focused program**.

“

Industry partners in the program help to define the research areas, shaping the technical and professional development of the STEM workforce of the future.

A photograph of a radio telescope array. In the foreground, several large, white, triangular-shaped antenna panels are mounted on metal frames. In the background, a tall, dark, cylindrical tower rises, topped with a complex structure of metal beams and equipment. The sun is shining brightly in the upper left, creating a lens flare effect across the sky. The sky is a clear, deep blue.

“ Industry needs access to new knowledge and the innovative thinking of Australia’s best minds in the university and research sectors

# Building innovation capacity

The Industry PhD program will build Australia's innovation capacity by **harnessing research excellence** across the **university, industry** and **science sectors**.

We aim to **create research leaders** who are work-ready and **understand the needs of industry**, their **own strengths**, and **how to collaborate with others**.

Attract high calibre candidates

Develop future research leaders

Promote collaboration

Contribute to an innovative Australia
