

Australia's National
Science Agency

Living STEM

Connecting Indigenous knowledges
to the classroom

Living STEM supports primary and secondary school teachers to embed Aboriginal and Torres Strait Islander scientific knowledges in the school learning program through hands-on inquiry projects to increase student engagement and achievement in STEM.

The program supports schools to build partnerships with Aboriginal and Torres Strait Islander families and communities, and foster reconciliation and respect for local Indigenous culture.

Living STEM benefits all students by providing authentic and engaging STEM learning that deepens the connection with the country and culture where they live.

Teachers at a Living STEM workshop investigating Indigenous grindstone technologies. (Top) Learning on country during a Living STEM workshop, Murujuga, Western Australia.

As Australia's national science agency, CSIRO is solving the greatest challenges through innovative science and technology. CSIRO. Unlocking a better future for everyone.
