

Developing responsible AI

Choose a problem or issue that you feel passionate about solving

What **problem** do you want to solve?

Could the responsible use of AI help solve this problem?

What tasks do you want AI to complete to help you solve the **problem**?

What does a successful outcome look like?

Utilising responsible AI

What checks and safety measures are required to ensure the responsible use of AI?

What are some of the steps you will take?

1.

2.

3.

4.

What kind of AI system could be created to solve this problem, and what skills or knowledge would it need to develop?

Supervised

Unsupervised
