

Innovate to Grow program: Health and medical technology

Applications are open for a free 10-week program for small to medium enterprises (SMEs) working on solutions in the health and medical technology sector to explore how research and development (R&D) can advance their project or idea.

Build your R&D idea

Small and medium-sized businesses (SMEs) play a key role in growing Australia's health and medical technology industry. But taking an R&D idea and turning this into reality can sometimes be a daunting prospect.

Our free self-paced 10-week program will build your skills to help you refine your innovation idea and turn this into a R&D opportunity.

Register today

Applications close: 12 June 2023

Program starts: 6 July 2023

Key program outcomes

Personalised support to refine your idea:

We'll step you through the process of turning your idea into a viable research project.

Confidential feedback: All submissions through the program portal will receive prompt expert feedback.

Mentor: You will be paired with a researcher from CSIRO or a university to help connect you with the relevant specialists.

Build your network: You will build key contacts in your sector, including researchers at CSIRO and universities, domain experts, funding professionals and other SMEs.

Key things covered include:

- Identifying your innovation opportunities.
- Refining your value proposition.
- Understanding the R&D viability.
- Helping you build your business case.
- Providing guidance on how to prepare a strong funding application.

Commitment and course outline

Preparing for the program (~2 hours)

Pre-workshop videos, onboarding, materials and questionnaires.

Week 1 (Official start date, 6 July 2023)

Workshop (4.5 hours)

Guest speakers from CSIRO, sector experts and SMEs who will provide tips and information on topics such as trends and opportunities, innovation experience and funding. You will also meet your fellow participants and mentor.

Weeks 2–10

Self-paced innovation program (2–3 hours per week)

Participants explore opportunities to grow their business through innovation and research.

Fortnightly virtual webinars for participant networking and guest speakers.

A final questionnaire is required at completion.

Who can attend

Participants working in health and medical technology sectors. This can be in any sub-sector including:

- Health and nutrition
- Digital health
- Botanical pharmaceuticals and nutraceuticals
- Diagnostics, biosensors and biomedical devices
- Biopharmaceuticals
- Drug discovery
- Vaccines and biologic therapeutics

Selection criteria (essential):

- Business classified as small to medium (<200 employees).
- A business currently, or in the early stages of, exploring R&D opportunities for their business and have an idea to work on throughout the course.
- Currently working in the health and medical technology sector (or have identified a new opportunity relevant to health and medical technology).
- An Australian registered and operating business with an ABN and ACN/ICN.

Other considerations:

- Any other information provided to support your application.
- Have a clear need to develop your knowledge and skills in R&D.

"I believe the program is a great way to distil and crystalize a specific project scope. Regardless of funding opportunities the ability to narrow down the scope of a potential project is extremely valuable."

– Chris Pistilli, Lead Consultant, Synergy Managed

"I found the program rewarding, enjoyable and thought provoking. It may not be a good fit for every organisation but for those looking to understand more about developing a process of innovation and learning how to engage with research institutes it was very useful."

– Julian Fay, Chief Technology Corporation, Senetas

CSIRO awards places to businesses based on the strength of the application, and a clear interest and capacity to pursue R&D. We also include participants from a variety of industry sub-sectors and regions.

CSIRO Innovate to Grow is delivered using [Practera's](#) online ed-tech platform and facilitation services.
